HISTORY OF BUILDINGS

State College of Washington

Name	Year Built
1. The Crib	1891

This first college building was a one-story, 36 feet by 60 feet structure. It cost $1500 and stood on the present site of the west end of the Women's Gymnasium. Story has it that The Crib is an integral part of that end of the present building, being refaced with brick when the gymnasium was constructed in 1901.

2. Old Ferry 1892

Construction on this building was begun in February of '92, one month after the opening of the college. It was a five-story building costing $45,000. Fire destroyed Old Ferry in November of 1897 and the present Ferry hall was built on the same site in 1899.

3. College Hall 1892

Construction on this building was begun in June, on the site of the present Science Hall on the south end of Bryan Hall. In 1899 it was removed to the ground now occupied by Bryan Hall, to make room for Science Hall. Its end came in 1907-08 when its frame structure was razed and the auditorium building constructed in its place.

4. Shops and Power Plant 1892

This was a $20,000 frame structure erected east of Ferry Hall. It served its original purpose for one year and in 1893 was converted into a gymnasium for the students.

5. Mechanic Shops 1893

Built on present site and included shops in building built year before.

6. Administration Building 1893

Actual construction on the Ad. building was not completed until 1894. It was formally opened January 1, 1895. Cost, $50,000.

more-more

7. Mining Building 1893

First used as a Creamery building. Functions now being transferred to Morrill hall.
